

Brief CV

Name	Changchun Yang	中文名	杨长春	
Gender	Man	Title (Pro./Dr.)	Dr	
Position (President...)	Vice-President	Country	China	
University/ Department	Jiujiang University			
Personal Website				
Research Area	Non-destructive testing techniques			
Brief introduction of your research experience:				
<p>Thermal stress corrosion theory to study the performance impact of low-temperature, high-voltage, under mechanical load environments for fiberglass reinforced epoxy composite insulators during the process of production and use, to produce major defects such as porosity, inclusions, stratification and cracks and the inside surface of the material. Analysis and study of deterioration mechanism under single or comprehensive factors, such as thermal shock, stress impact and partial discharge deterioration factors, for glass fiber epoxy composites insulators performance enhancements, and use Related artificially accelerated deterioration to test performance-related, so as to achieve the purpose of composite insulators guarantee long-term reliable operation.</p>
